

As a contracted detailer with us here at All American Mobile Detailing you'll be required to have your own equipment. As this can cost upwards of \$1000+ this may be difficult to overcome as you may have financial restrictions. To help you overcome this hurdle AAMD has started distributing equipment. We have sourced all equipment and leveraged our wholesale ability to get you 15-25% off of all of these items. You are more than welcome to purchase your own equipment, but purchasing through us will not only save you money, but time as well as we keep all of the equipment that you would need on hand. We can have everything packaged and sent to you so that you are ready and equipped by the end of your training. If you do not have any of the required supplies, materials, or equipment then will need just about \$1600 to get started with all of the required equipment. Below you will find Five different companies from which you can take a small personal loan to aid in your financing! Most companies will offer you a year long term limit, meaning you'll be making monthly payments at or around \$120. In most major cities working 5 days a week you can make around \$800-\$1000 a week. Well worth the investment!

If you are financing; After your interview you will get a financing call from the hiring manager where you will discuss all of your financing options.

As a last resort we can offer financing, where we will send you the equipment so that you can get started, then we will just take the loan out of your paychecks over a 12 week period. To qualify for in house financing you will have to go through this call with the manager and exhaust all other options.
